

MUHAMMAD HARIS EJAZ

Sbzazar, Lahore, Pakistan

+92 304 4155 070 — harisbinejaz75@gmail.com

SKILLS

JavaScript, TypeScript
Bootstrap, TailwindCSS
reactJS, react hooks
NextJS, redux, redux-toolkit
Webpack, ESLint, Prettier
Git, Github, Bitbucket
Golang, NodeJS, Express

WORK EXPERIENCE

Datum Brain

Software Engineer — Full-time

Oct 2020 - Present

Lahore, Pakistan

- Primarily engaged as a **frontend developer** with more than **2 years** of experience working with niche technologies, including **JavaScript, TypeScript, ReactJS, Tailwind CSS, and NextJS**.
- Developed an in-house ERP system to automate **HR** and **Finance** functionalities which led to a **45%** reduction in budget costs
- Participated in bi-weekly **retrospective** of assigned projects that increased team **coordination** by **40%**
- Reviewed **4-5 PRs** in a week to enhance **code quality** of team by **20%**
- Held bi-weekly **client meetings**, to keep them updated about project **progress** resulting in **23%** increase in client satisfaction
- Held **15 knowledge sharing sessions** that developed a healthy learning environment within the team
- Trained **3 junior devs** that scaled company growth by **15%**
- Implemented multiple website **frontends** with seamless **pixel-perfection** and **responsiveness** across all devices
- Dispatched multiple projects way before the **deadline** that boosted company **profile** by **25%**
- Operated in an **agile methodology** environment which **accelerated** project deliveries by **30%**

PROJECTS

Big Data Translation App

- Organized meeting of **4 people** every Monday to setup weekly goals
- Implemented admin side of the project using **react, redux, tailwindCSS** and **vite**
- Built a beta version of the mobile app using **react-native** with a team of **3 developers**
- Published the **beta version** of the mobile app to **internal testers** on **Google Playstore**
- Integrated admin side of the web app with the backend **API**

Video Recording as a Service

- Developed a **JavaScript SDK** to interact with the backend team's recording service.
- Utilized Angular to create multiple **POCs** demonstrating the integration of the custom **JS SDK**.
- Showcased the functionality and capabilities of the recording service through these **POCs**.
- The client was managing numerous remote teams, and our team received **recognition** for putting extra efforts.
- Conducted multiple successful **demos** of the project within a team of **8 developers**

Mecku

- Collaborated with a **senior ReactJS** developer on a data visualization application.
- Engaged in direct **communication** with the client to provide regular project progress updates.

- Utilized **retejs** to create an interactive canvas for **visualizing** drag-and-drop data sources, dumps, and transformations.
- The **canvas** allowed users to connect these components and run data processing **jobs** efficiently.

Resource Scheduling as a Service

- Reported to a **senior Golang resource** to develop multiple **REST API** requests
- Collaborated in a team of **3 developers** to develop frontend of the project using **reactjs**, **redux** and **SCSS**
- Produced highly maintainable and reusable **react components**
- Requested **2-3 PRs** reviews every week from **2 senior JavaScript** developers
- Engaged in bi-weekly **retrospective** of **5 people**
